ATTENTION – heated track-system with glass-ceramics-coating (ASS) without snow !!

The Wurmberg ski jump (K 90) has been equipped with the new heated track system, designed by Joachim Winterlich. Its characteristics are equal to a well prepared snow track. The track with its special coating is only apt for jumping skis with plastic-soles. Because snow falling onto the track during competition melts instantly, the heating system will equalize conditions for all competitors.

How to prepare your ski:

- Wipe off the slides.
- Do not diagonally carve in the slides.
- Vertical and so-called cross structures are corresponding to snow and temperatures (this mainly concerns the weather conditions on the trodden landing slope) absolutely acceptable, that is favourable.
