### **ATTENTION – heated track-system with glass-ceramics-coating (ASS) without snow!**

The Wurmberg ski jump (K90/HS 100) has been equipped with the new heated track system, designed by Joachim Winterlich. Its characteristics are equal to a well prepared snow track. The track with its special coating is only apt for jumping skis with plastic soles. Due to the fact that snow falling onto the track during the competition is melting instantly, equal conditions for all competitors can be assured.
